Not illustrated. 1918 Excerpt: . per cent butterfat valuation is set, an increase or decrease In price is commonly paid for each 1-10 per cent butterfat found by the Babcock test in excess of or below the standard. Skim milk is a highly nitrogenous food. With grain as a supplement it makes a balanced ration. The fullest value of skim milk is obtained only when it is used as a stock feed. It is adaptable to that end, since it contains a large proportion of the needful elements required for cheap and rapid development of growing livestock and poultry. Feeding skim milk is rather an involved process of making money. It is not a flashy method. Feeding operations extend over a long period and the gradual cumulative value of skim milk thus used is overlooked. Yet a plan of dairy farming that has skim milk as its cornerstone is the most enduring and financially successful. A farmer, who is in a position to carry on diversified farming, is handing himself the best end of the deal when he deliberately plans a scheme for marketing his milk in such a way that he can retain his skim milk where produced. Unless he can retail his own milk, it is obviously wisest to sell his butterfat at a good price and still keep the skim milk on the farm. The deal enables him to reduce his feed bill. The high protein and ash content of skim milk gives it a fine value...
